EDUCATION

B.Tech, Computer Science (Internet of Things) — Vellore Institute of Technology Expected 2027
CGPA: 8.00

EXPERIENCE

Software Development Intern — Zeta, Bangalore

May 2026 – Jun 2026

- Built an automated testing framework to run tests, record executions, and generate reports, cutting test execution time by 75%
- Engineered a UI automation suite of 150+ test cases for a production application.

Development Intern — Pelorus Technologies, Mumbai

May 2025 – Jul 2025

- Designed secure authentication workflows and implemented role-based access control (RBAC).
- Applied credential protection and secure access control best practices across the platform.

PROJECTS

AI Fashion Assistant

Flutter, FastAPI, PostgreSQL, Supabase, Python

- Built an AI-powered outfit recommendation system personalized to body type, skin tone, occasion, weather, and style preferences.

Industrial Gas Leak Detection System — Central Hackathon Finalist ESP32, MQ2, MQ7, DHT11, Python, CV

- Built an IoT-based industrial safety system combining gas/temperature/humidity/occupancy sensors with AI camera monitoring to trigger real-time hazard alerts.

Real-Time Traffic Management System Using Fog & Embedded Systems ESP32, YOLO, OpenCV, Fog Computing

- Integrated YOLO with OpenCV for real-time vehicle detection and traffic density estimation; used fog computing to reduce latency for faster decisions.

Anonymous Peer Advice & Support Platform — Full-Stack Project | Ongoing

- Developed the complete responsive frontend using Next.js, TypeScript, Tailwind CSS, and Framer Motion, implementing anonymous question posting, domain-based feeds, repplier profiles, assessments, and feedback flows.
- Currently developing the backend with Supabase/PostgreSQL and integrating AI-powered safety moderation, PII detection, repplier assessment, and intelligent question–replier matching.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, SQL

Frontend/Mobile & Backend: HTML, CSS, Flutter, Tailwind CSS, FastAPI, PostgreSQL, Supabase, REST APIs

AI/ML & IoT: YOLO, OpenCV, ESP32, Arduino, IoT Sensors, Fog Computing

Core Concepts: Data Structures & Algorithms, OOP, Secure Authentication, Git/GitHub

ACHIEVEMENTS

- 3rd Place, Add-a-thon — GraVITas '23, VIT
- Central Hackathon — Cleared Stage 1 & Stage 2 (out of 150+ teams)
- Smart India Hackathon (SIH) — Cleared Stages 1–4
